# NOTICE TO SWANSEA RESIDENTS

## SWANSEA DISTRICT RETICULATED WATER SUPPLY

### CONTINUED BOIL WATER ALERT

11<sup>th</sup> DECEMBER, 2006

**This notice is to advise you to still treat your water prior to consumption. Bringing water to a rolling boil is recognised as an adequate treatment process.**

This notice has been issued due to previous routine drinking water sample results failing, with unsatisfactory levels of bacteria present. Accordingly, there is a recognised risk that at various times the water may not be of a potable quality i.e. of drinking water standard which complies with the Australian Drinking Water Guidelines.

Ongoing investigations, including monitoring are being undertaken to address the issue.

This notice will be removed in due course when the water supply is considered to be in compliance with the relevant guidelines.

*NB This Boil Water Alert also applies to residents who utilise water from a private source e.g.: Tank Water, River Water, Dam Water etc.*

Gordon Mallett  
**GENERAL MANAGER**
